

of almost 50 million of its own children. Some of them, Mr. Speaker, died and screamed as they did so, but because it was amniotic fluid passing over the vocal cords instead of air, no one could hear them.

And all of them had at least four things in common. First, they were each just little babies who had done nothing wrong to anyone, and each one of them died a nameless and lonely death. And each one of their mothers, whether she realizes it or not, will never be quite the same. And all the gifts that these children might have brought to humanity are now lost forever. Yet even in the glare of such tragedy, this generation still clings to a blind, invincible ignorance while history repeats itself and our own silent genocide mercilessly annihilates the most helpless of all victims, those yet unborn.

Mr. Speaker, perhaps it's time for those of us in this Chamber to remind ourselves of why we are really all here. Thomas Jefferson said, "The care of human life and its happiness and not its destruction is the chief and only object of good government." The phrase in the 14th Amendment capsulizes our entire Constitution, it says, "No State shall deprive any person of life, liberty or property without due process of law." Mr. Speaker, protecting the lives of our innocent citizens and their constitutional rights is why we are all here.

The bedrock foundation of this Republic is the clarion declaration of the self-evident truth that all human beings are created equal and endowed by their Creator with the unalienable rights of life, liberty and the pursuit of happiness. Every conflict and battle our Nation has ever faced can be traced to our commitment to this core, self-evident truth.

It has made us the beacon of hope for the entire world. Mr. Speaker, it is who we are.

And yet today another day has passed, and we in this body have failed again to honor that foundational commitment. We have failed our sworn oath and our God-given responsibility as we broke faith with nearly 4,000 more innocent American babies who died today without the protection we should have given them. And it seems too sad to me, Mr. Speaker, that this Sunset Memorial may be the only acknowledgement or remembrance these children who died today will ever have in this Chamber.

So as a small gesture, I would ask those in the Chamber who are inclined to join me for a moment of silent memorial to these lost little Americans.

Mr. Speaker, let me conclude in the hope that perhaps someone new who heard this Sunset Memorial tonight will finally embrace the truth that abortion really does kill little babies; that it hurts mothers in ways that we can never express; and that 12,875 days spent killing nearly 50 million unborn children in America is enough; and that the America that rejected human slavery and marched into Europe to arrest the Nazi Holocaust is still courageous and compassionate enough to find a better way for mothers and their unborn babies than abortion on demand.

So tonight, Mr. Speaker, may we each remind ourselves that our own days in this sunshine of life are also numbered and that all too soon each one of us will walk from these Chambers for the very last time.

And if it should be that this Congress is allowed to convene on yet another day to come, may that be the day when we finally hear the

cries of innocent unborn children. May that be the day when we find the humanity, the courage, and the will to embrace together our human and our constitutional duty to protect these, the least of our tiny, little American brothers and sisters from this murderous scourge upon our Nation called abortion on demand.

It is April 23, 2008, 12,875 days since Roe versus Wade first stained the foundation of this Nation with the blood of its own children, this in the land of the free and the home of the brave.

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Oregon (Mr. DEFAZIO) is recognized for 5 minutes.

IN SUPPORT OF H. CON. RES. 322, RECOGNIZING THE 60TH ANNIVERSARY OF THE FOUNDING OF THE MODERN STATE OF ISRAEL

The SPEAKER pro tempore (Mr. SPACE). Under a previous order of the House, the gentleman from New Jersey (Mr. GARRETT) is recognized for 5 minutes.

Mr. GARRETT of New Jersey. Mr. Speaker, I rise now to honor an ally who has stood with us in the global war on terrorism. An ally who knows what it's like to fight for peace and for freedom. An ally that continues to pursue liberty even amid increased threats. That ally is Israel.

A millennia ago the Israelites providentially escaped from captivity in Egypt. That event is remembered this week as Jews around the world celebrate Passover. Yet their struggles, of course, did not end after Moses' leadership.

Less than 10 decades ago, Israel was one of the most violent spots on the planet as various governments sought to destroy the fledgling nation. Today, just 60 years after its establishment, Israel has prospered and contributed to the economic, scientific, medical, and agricultural success of nations both in the Middle East and around the world.

I am a proud cosponsor of House Concurrent Resolution 322, which recognizes the 60th anniversary of the founding of the modern State of Israel, and it reaffirms the bonds of close friendship and cooperation between the United States and Israel.

Tonight I also want to recognize Israel's achievement in one particular area as well, and that is agriculture. And maybe it's fitting, with Earth Day here, this topic is especially relevant.

Israel is 60 percent desert, and yet scientists have found innovative farming methods that have allowed the desert there to bloom. Not only has Israel shared its newfound knowledge with the United States, but they have also shared technology and techniques with other nations which contain desert regions.

For example, the world's first surface drip irrigation system was developed in a Kibbutz near Beersheba in the 1960s. It was after an Israeli water engineer noticed a hedge that was noticeably different, healthier and taller. The man, Simcha Blass, used his discovery to create an irrigation device that uses friction and water pressure loss to leak drops of water at regular intervals. So today fruits and vegetable growers in many dry areas around the world use this drip irrigation method thanks to Israel.

In addition, scientists in Israel have developed genetically modified, disease-resistant fruits like bananas and peppers and other crops. These fruits and vegetables help expand the world's supply of food and maintain low prices at grocery stores here and abroad.

Since the 1970s Israel has partnered with the U.S. in several joint scientific ventures, including the Bi-national Agricultural Research Development Fund, BARD. This group basically focuses on enhancing agricultural productivity.

Israel has also pioneered advances in desalination. It was in Eilat, an arid city located at the intersection of the desert and the Red Sea, and it used to be a really barren settlement due to shortages in the water supply. Back then visitors had to bring their own water and wash their laundry in buckets. But today residents own swimming pools, plant flower gardens, and relax in shaded, grassy yards. It is due to desalination, and now the city is self-sufficient in maintaining its own water supply.

Desalination, which turns seawater into freshwater by separating salty compounds from water molecules, is now being considered here in the U.S. in places like Georgia and Texas and Florida. And according to the International Desalination Association, desalination makes up more than half of the freshwater used in the Middle East and North Africa, again thanks to Israel.

Clearly, Israel has demonstrated expertise in agricultural innovation. And as representative of the great State of New Jersey's Fifth District, which is home to many small farms, and New Jersey is called the Garden State, I appreciate Israel's agricultural developments and its willingness to disseminate research and to share that across international boundaries.

So I conclude simply by saying I salute Israel on its anniversary and its many achievements, and I thank that nation for making that nation what it is and for making the United States a better country as well.

FORECLOSURE

The SPEAKER pro tempore. Under a previous order of the House, the gentlewoman from Ohio (Ms. KAPTUR) is recognized for 5 minutes.

Ms. KAPTUR. Mr. Speaker, the housing foreclosure crisis in America is getting worse. Last February alone
